

## *Analogue or SDI Safe Area Cage Generator*

BlueLucy by Shootview presents a Safe Area Generator for all Standard and Widescreen TV & Film Formats. How many times have you seen captions cut off and action blanked by the broadcaster fitting one format into another? The Blue Lucy Cage Generator can avoid this by showing on the production monitor areas likely to be cut off and lost in the blanking.

### *Features*

- Provides safe area cages and cutouts for 4:3, 14:9 and 16:9
- Fast and accurate AFD (Active Format Descriptor) indexing
- SDI / looping YCrCb Input YCrCb / RGB / YC / Composite Output, SDI versions
- Multiple simultaneous on-screen cages either white or black (selectable)
- 1.55:1, 1.66:1, 1.75:1, 1.77:1, 1.85:1, 2.35:1 film format cutouts available
- 4:3, 14:9 and 16:9 cross format cutouts
- 4:3, 14:9 and 16:9 blanking, safe graphics & safe action cages
